

Project Executable Files

Date	2 July 2026
Team ID	XXXXX
Project Name	Opti Crop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 marks

Project Executable Files

Step 1: submission checklist

S.No	Item to submit	Submitted(Yes/No/NA)
1	Complete source code (all files and folders)	yes
2	README/setup guide (instructions to run the code)	yes
3	Requirements.txt/package. Json/dependency file	yes
4	Database schema/seed files (if applicable)	NA
5	Environment configuration file (. env .example or similar)	no
6	Deployed application URL(if hosted)	No
7	APK /Executable binary (if applicable for mobile /desktop apps)	NA
8	Docker file/Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough (if required)	Yes

Step2 : File / Folder Structure

Step 3 : Deployment /Access Details

Field	Details
Hosted / deployed URL	https://opti-crop12.onrender.com
Login credential s (Demo)	
Platform /Hosting provider	postman
Repository link	https://github.com/pranathirompicherla12-creator/smart-agriculture.git
Demo video link	https://drive.google.com/file/d/14LFQflu3_Yzvi2_nk_dAXweLDT_PciFS/view?usp=sharing

Step 4: run instructions

1. Open the deployed application using the hosted URL:
<https://opti-crop12.onrender.com>
2. Wait a few seconds for the application to load (first request may take longer).
3. Click on "Find Your Crop" or "Predict Crop".
4. Enter the required values:
 - Nitrogen (N)
 - Phosphorus (P)
 - Potassium (K)
 - Temperature
 - Humidity
 - pH
 - Rainfall
5. Click the "Predict" button.
6. The system displays the recommended crop along with the prediction result.

Step 5: known issues /limitations

S.No	Known issues/limitations	Workaround /status
1	First page load may take 30–60 seconds because the free Render service goes to sleep when idle.	Refresh the page or wait for the application to wake up.
2	Internet connection is required to access the deployed application.	Use a stable internet connection.
3	Prediction accuracy depends on the correctness of the input values provided by the user.	Enter valid soil and environmental parameters.
